Fadil Al Farhan

CTO / Technical Lead / Fullstack Developer | TypeScript, Vue, Node.js, NestJS, AWS | Architecture, Delivery, Cloud
Uppsala, Uppsala län, Sverige

Sammanfattning

Teknisk ledare och fullstackutvecklare med erfarenhet av att driva utveckling, arkitektur och leverans i affärskritiska plattformar. Jag arbetar nära både teknik och verksamhet, med fokus på att bygga skalbara, hållbara och pålitliga lösningar. Min styrka ligger i att kombinera hands-on utveckling med tekniskt ägarskap inom frontend, backend, cloud, CI/CD och systemdesign. Jag har arbetat med TypeScript/JavaScript, Vue, Node.js, NestJS, AWS, MongoDB, SQL, testautomatisering och analysnära system. Utöver implementation driver jag tekniska riktlinjer, förbättrar struktur i växande kodbasen och skapar tydlighet i gränslandet mellan affärsbehov och tekniskt genomförande. Det som främst definierar mig är att jag tar ansvar för helheten – inte bara för att koden fungerar idag, utan för att lösningen är begriplig, hållbar och redo att växa över tid.

Erfarenhet

Kaptena

CTO / Technical Lead / Fullstack
november 2023 - Present (2 år 11 månader)
Stockholms län, Sverige

CTO / Tech Lead

Kaptena | Nov 2023 – Present

Leading the technical direction and development of scalable, business-critical platforms across frontend, backend, cloud infrastructure, and shared system architecture.

Working hands-on while also driving technical leadership, long-term architecture decisions, developer workflows, and delivery quality in a fast-moving environment.

Key Responsibilities & Contributions

Leading the technical development of scalable financial platforms and internal systems

Driving architectural decisions focused on maintainability, scalability, performance, and long-term sustainability

Working hands-on with TypeScript, JavaScript, Vue.js, Node.js, NestJS, MongoDB, SQL, AWS, and CI/CD pipelines

Designing and improving serverless cloud solutions using AWS Lambda, S3, IAM, CloudFront, CloudFormation, and related AWS services

Establishing technical guidelines, coding standards, testing strategies, and engineering best practices across projects

Building reusable shared architectures and improving developer experience within monorepo environments

Acting as a bridge between business and technology by translating complex business requirements into scalable technical solutions

Contributing within analytics and reporting through SQL, data processing, and Zoho Analytics

Supporting release management, DevOps workflows, automation, and operational reliability

Mentoring developers and contributing to technical leadership, prioritization, and engineering direction

Core Technologies

TypeScript • JavaScript • Vue.js • Quasar • Node.js • NestJS • MongoDB • SQL • AWS • Serverless • CI/CD • CloudFormation • GitHub Actions • Docker • Zoho Analytics • Monorepo Architecture • REST APIs • System Design

Aktieinvest

Full Stack Engineer

juni 2022 - november 2023 (1 år 6 månader)

Stockholms län, Sverige

Full Stack Engineer

Worked with modern web development across frontend engineering, backend integrations, databases, and API-driven solutions with a strong focus on performance, scalability, maintainability, and user experience.

Collaborated closely with developers, designers, and stakeholders to deliver responsive and business-focused web applications while continuously improving both technical quality and development workflows.

- Developed and customized responsive websites and web applications using HTML, CSS, JavaScript and jQuery
- Built and maintained interactive frontend solutions using Vue.js and Nuxt.js with a focus on usability, responsiveness, and clean architecture
- Improved backend functionality and implemented new features using Java and REST APIs to support business-critical workflows

- Integrated frontend applications with external and internal APIs while ensuring stable communication, performance, and data consistency
- Created dynamic and reusable web content using the Freemarker template engine
- Managed and optimized PostgreSQL databases with a focus on performance, reliability, security, and efficient data handling
- Wrote and optimized SQL queries for reporting, integrations, and application functionality
- Performed API testing, debugging, and documentation using Postman to improve development and integration workflows
- Worked with DBVisualizer for database management, troubleshooting, and query optimization
- Contributed to improving application performance, frontend responsiveness, accessibility and overall user experience
- Participated in troubleshooting, bug fixing, feature planning, and continuous improvements across multiple projects
- Collaborated in agile and cross-functional teams while maintaining close communication between technical and non-technical stakeholders
- Stayed up to date with modern frontend technologies, development practices, and industry trends to continuously improve both product quality and engineering standards

Sigma Technology Digital & Cloud Solutions AB

Full Stack Engineer

september 2021 - juni 2022 (10 månader)

Stockholms län, Sverige

Frontend Developer

Worked on an innovative project called SkillUpTool for Head-on-Nails — a cloud-based digital ecosystem focused on developing, validating, and verifying professional skills through structured and quality-assured processes.

The platform connected multiple stakeholders, including private and public organizations, individuals, educational institutions, sector organizations, and employment services, creating a collaborative ecosystem for competence development and workforce validation.

- Contributed to the development and improvement of a cloud-based platform designed for skill validation and professional development
- Built modern and responsive user interfaces using React.js, JavaScript, HTML, and CSS
- Developed interactive frontend functionality with a strong focus on usability, accessibility, and user experience

- Integrated frontend applications with APIs and backend services to support dynamic workflows and data-driven functionality
- Collaborated closely with developers, designers, and stakeholders to translate business requirements into scalable technical solutions
- Contributed to improving application performance, responsiveness, and maintainability across the platform
- Participated in feature development, troubleshooting, testing, and continuous platform improvements
- Worked in an agile and collaborative development environment with cross-functional teams
- Gained experience working with complex digital ecosystems involving education, employment services, validation processes, and organizational collaboration

SBK Sweden AB

Administrativ - Ekonomiassistent

mars 2017 - maj 2019 (2 år 3 månader)

Årsta, Stockholms län, Sverige

Order in matning, fakturering, kassa, kundbemötande (direkt/mail/telefon), visma administration, Visma AutoCollect (Inkassotjänst) mm.
